

**Broadband Stakeholders Workshop
17 January 2008**

**Panel Discussion
1-3 pm**

"If I had broadband, I would..."

What should the priorities of Lebanon be when it comes to applications of broadband? What are the possible opportunities and needs of the Lebanese? The main theme of the panel is "If I had broadband, I would..."

We invite the audience to a discussion with our distinguished panel:

Dr. Nadim Cortas	Vice President for Medical Affairs / Dean of the Faculty of Medicine and Medical Center
Gabriel Deek	President, Professional Computer Association CEO, OmniSystems
Robert Madi	CIO, Lebanese Broadcasting Corporation
Fadi Sabbagha	CEO, Born Interactive
Dr. Michel Sfeir	CEO, Paravision

The panel discussion will be moderated by Diogo Vasconcelos, Distinguished Fellow, Cisco Internet Business Solutions Group (IBSG). Diogo will introduce the audience to the types of applications that can stimulate demand, and highlight the private sector's role in pushing demand.

Fadi Moubarak, General Manager Levant, Cisco Systems, will walk us through an interactive demo showcasing the applications that broadband connectivity will enable, and that most likely will be demanded by the Lebanese citizens.
